Education

Bachelor's in Computer Science | VIT Bhopal University

CGPA - 8.12 | 2022 – 2026

12th Standard | Kailash Chandra Memorial School, Moradabad

Percentage - 76.6% | 2021 – 2022

Experience

SDE Intern | Outlier

June 2025 - September 2025

React JS, Node JS, Express JS, MongoDB, Web Sockets, OulierAI

- Engineered and maintained responsive, scalable user interfaces using React.js, TypeScript, and modern UI frameworks integrated with OutlierAI — enhancing engagement and ensuring seamless functionality across devices.
- Revamped a legacy platform into a real-time web system, cutting content update time by 95% (from 3–4 hours to under a minute).

FullStack Web Developer Intern | JBM Neel Metals

November 2024 - January 2025

React JS, Node JS, Express JS, MongoDB

- Developed and implemented a Product Management System and Employee Onboarding Platform using the MERN stack, improving product tracking accuracy and reducing onboarding time by 20–30%.

Web Developer Intern | Vidyamint ERP

September 2024 - November 2024

React JS, Node JS, Express JS, AWS, SQL

- Built and implemented 4+ interactive dashboards and 10+ data-driven forms to digitize student–faculty workflows, improving administrative efficiency by 40% and enhancing accessibility.
- Integrated the Google Calendar API for automated event scheduling, reminders, and timetable synchronization, reducing manual coordination time by 60% across the institution.
- Optimized backend API responses, cutting average data fetch latency by 35%, resulting in a smoother user experience.

Projects

DevStudio | *TypeScript, Next.js, Convex, Clerk, Tailwind CSS, Lemon Squeezy, ESLint* | [Link](#), [Github \(Api\)](#),

- Architected a full-stack online compiler with Next.js and TypeScript which supported 10+ programming languages and improved code execution speed by 30% in a team of 3 engineers.
- Optimized backend workflows and state management with Convex, achieving 30% faster synchronization, while enforcing TypeScript + ESLint standards to cut QA-reported bugs by 25% and ensure long-term scalability

Decentralized-Fiver | *TypeScript, PostgreSQL, AWS services, PresignedURLs, Phantomwallet* | [Link](#), [Github \(Api\)](#)

- Constructed a trustless freelancing marketplace using TypeScript, PostgreSQL, AWS S3 (Presigned URLs), and Phantom Wallet, enabling secure asset storage, blockchain-based authentication, and transparent payments between clients and freelancers.
- Engineered scalable backend workflows with AWS services, improving file upload/download efficiency by 40%, while ensuring reliability, high availability, and a seamless user experience across the platform

LEXA | *AWS, MongoDB, ExpressJS, ReactJS, NodeJS, GenAI, Docker* | [Link](#), [Github](#)

- Developed a full-stack coding platform with a real-time code editor, multi-language support, test cases, and submission tracking, integrating AI-powered code review (OpenAI API) for automated feedback and quality analysis.
- Executed a Dockerized CI/CD pipeline (GitHub Actions + AWS CodePipeline) with zero-downtime deployments on EC2, scalable infrastructure using containerization and automated testing, and AWS S3 for static asset management—reducing deployment time by 70% and improving release reliability.

Technical Skills

Languages - C/C++, JavaScript, TypeScript, Python, Java

Frontend - HTML, CSS, React JS, Next.js, Tailwind CSS, Redux

Backend - Node JS, Express JS, Web Sockets, Next.js

Database - MongoDB, MySQL, PostgreSQL

Additional - Generative AI, Git, Github, Docker, Web Scraping

Coursework - Data Structures and Algorithms, Object-Oriented Programming System, Database Management Systems

Certifications

* AWS Certified AI Practitioner | [Verify](#)
